

# Downloading & Using the CamScanner App

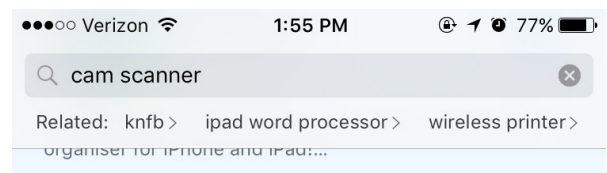

The CamScanner app allows you to turn your smartphone or tablet into a scanner so that you can combine documents or scan in handwritten forms.

## 1) Download the app

You can search for CamScanner in the App Store or scan the QR code (hint: Snapchat allows you to scan QR codes!).

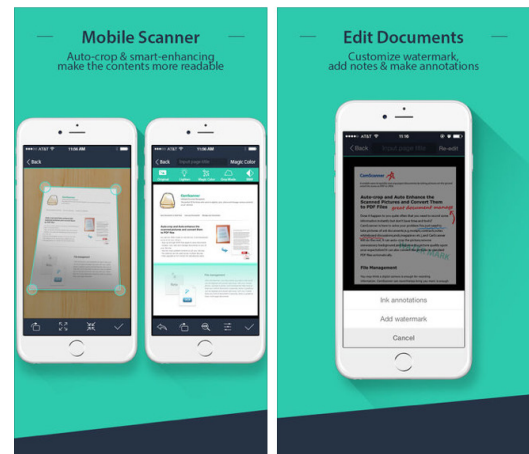

Scan the QR code to download

## 2) Combine your application materials into one PDF or scan your handwritten form

- Open the app and click the camera button at the bottom
- You can scan in a single page or a “batch”
- Once you’ve scanned all you need, you can make edits and then email a PDF file to yourself
- This is the file you can send to us with all your application materials
